

RAHUL DEIVASIGAMANI

MSc in Cybersecurity & AI | CompTIA Security+ | (ISC)² CC

+31 6 38348300
deiv.rahul@gmail.com
Nijmegen, Netherlands
github.com/b33pb00pb0t
linkedin.com/in/rahuldeiv/

Master's student specializing in AI Security, with a strong foundation in security principles, deep learning, and cryptography. Passionate about securing large language models (LLMs), researching AI-driven threats and contributing to research-focused roles in the intersection of security and AI.

EDUCATION

Radboud University

Master of Science in Cybersecurity & AI | GPA: 8.5

Relevant courses: Security and Privacy of Machine Learning, Deep Learning, Online Tracking & Privacy, Applied Cryptography, Advanced Network Security

Nijmegen, Netherlands

Aug 2025 – Present

BMS College of Engineering

Bachelor of Engineering in Electronics and Communication Engineering | GPA: 8.06

Indian Public School

Higher Secondary Education | GPA: 8.42

Bangalore, India

Aug 2017 – June 2021

Kuwait

March 2017

PROJECTS

Kaggle Akkadian Translator: LLM Fine-Tuning & NLP | PyTorch, LLaMA/Tower+, ByT5, PEFT/QLoRA

- Developed a dual-architecture translation pipeline, utilizing Byte-level T5 (ByT5) for character-level parsing and fine-tuning a 9B-parameter LLM (Tower+) via PEFT/QLoRA.
- Engineered memory-efficient distributed inference for a 9B model across resource-constrained GPUs (Dual T4) by implementing CPU offloading, BF16 mixed-precision, and dynamic memory allocation.
- Maximized output robustness against corrupted inputs by building aggressive regex-based data sanitization pipelines and evaluating generations through Hybrid Minimum Bayes Risk (MBR).

Web Privacy Measurement & Tracking Analysis | Python, Playwright, Web Tracking & Privacy Analysis

- Designed and implemented a Playwright-based web crawler to measure online tracking and privacy behaviors across 40 international news websites.
- Analyzed HTTP traffic (HAR files), cookies, and headers to quantify tracking intensity and perform a comparative analysis of third-party data sharing and advertising prevalence across US and EU regions.
- Investigated privacy-relevant HTTP headers (Permissions-Policy, Referrer-Policy, Accept-CH) and identified cross-entity redirects and CNAME-based tracking.

CERTIFICATIONS

CompTIA Security+

(ISC)² Certified in Cybersecurity (CC)

Issued: July 2023

Issued: July 2023

EXPERIENCE

Deloitte Consulting USI

Analyst - SAP ABAP

Aug 2021 – Aug 2025

Bangalore, India

- Developed and maintained business-critical SAP ABAP code for enterprise-scale SAP systems, adhering to strict software development lifecycle (SDLC) and change control protocols
- Collaborated with global support teams to deliver solutions for projects across diverse geographies
- Performed root-cause analysis for high-priority incidents in production environments, ensuring rapid resolution and minimal business disruption

TECHNICAL SKILLS

Languages: Python, C++, Bash Scripting, ABAP

AI & Machine Learning: PyTorch, TensorFlow, HuggingFace (Transformers, PEFT/QLoRA), scikit-learn

Agentic Automation & Security: OpenClaw, Playwright, ADB (Android Debug Bridge)

Developer Tools: Git, VS Code

Core Competencies: LLM Vulnerability Assessment, Adversarial Robustness, Prompt Injection Analysis
